Lighting | Heating | Power and Charging

All sturdesign shade products can be manufactured to accommodate internal wiring for power supply. We can prepare our products to receive your specified lighting or heating. Our structures can also be prepared for SOLAR PANELS, POWER/USB OUTLETS and OUTDOOR SPEAKERS - based on your project requirements. Electricians are required to complete installation. Contact your local representative or email info@sturdesign.com for options and specifications.

Finishes

We offer a range of super durable powder coatings in a wide selection of finishes. For current standard selections please go to www.sturdesign.com/finishes.

Smooth Finishes

Textured Finishes

Let us know what color you require or send us a sample and we'll do all the work to ensure the best possible color match. Additional costs may apply, please contact us if you require specific information.

Standard RAL and Color Matching Available

Specification

Contact Stur Design for design assistance and to obtain 2D CAD, 3D models and CSI Specifications

General

Where indicated in plan drawings or on schedules supply and install aluminum shade structures as designed and manufactured by:

Stur Design Inc.

Brantford, Ontario.

Phone 855-207-9669

Fax 289-207-0341

Email: info@sturdesign.com

Structures will be supplied as configured in the plan drawings and will include all components and finishes as specified and required for quality installation

Warranty

25-year limited manufacturer's structural warranty

Finishes

Aluminum structures finished utilizing Stur Design's super durable polyester powder coating. All wood products receive a single application of semi-transparent weatherproof protective coating unless specified otherwise.

Selection a standard finish at www.sturdesign.com/finishes or specify RAL numbers / colors for matching.

Installation

Stur Design's pre-fabricated manufacturing process simplifies onsite assembly and installation. We provide step by step instructions and we supply all the required stainless-steel hardware. Typical mounting installation utilizes post-installed mechanical or adhesive anchors, custom site-specific solutions are available.

Maintenance

Stur Design structures are designed to provide extremely long service life. The powder coating will provide a high-quality finish for many years. Inspections of mechanical fastenings, including column and building connections, should be conducted yearly, and cleaned / tightened as necessary.
